

# 3M™ Digital Easel

The 3M™ Digital Easel is designed to increase productivity in a business, government and higher education environment where sharing ideas, brainstorming and saving every stroke of a pen is a necessity.

## Boost Productivity:

**3M combines the traditional easel with simple technology to electronically capture notes as they are being written.**

- Preserve a record of collaborative brainstorming by saving notes in a variety of formats including: WBD, PDF, HTM, BMP, JPG, TIF, PPT, EPS, EMF.
- No separate power source needed, just connect the USB cable to your computer.
- Email and /or print easel pad notes to share with colleagues instantly.
- Allows everyone to focus on brainstorming and leave the meeting with the same notes.
- Collaborate with participants in remote locations in real time with the Shared-Meeting application.
- Keep absentee colleagues on track with the Playback feature by allowing brainstorming sessions to be reviewed in sequence at any time. Recording starts with the first pen stroke.
- No need to type up meeting notes ever again.
- Use standard flip chart or Post-it® Meeting charts.
- Separate stand for easel available

## 3M™ Digital Easel

### Minimum System Requirements:

#### Windows Operating Systems

- Microsoft® Windows® compatible computer with Pentium® 100+ Mhz processor
- Windows 98, 200, ME, XP and NT 4.0 compatible (other platform users may view shared meetings via Java™ applet through Java-enabled Internet browser)
